The mission of Elite International School (EIS) is to prepare students to become productive and successful citizens. This includes educating them to write clearly, read and comprehend, compute accurately, think, reason, analyze, and use information to develop problem solving skills.

We at EIS strongly believe that each child should be treated as an individual. We do not follow “shoot in the middle” approach to education; instead we use our resources to design a program which enables us to assess the student’s requirements and to develop them as lifelong learners. To achieve this goal: we chose the American curriculum provided by Harcourt Publishers, which offers a well developed program and excellent resources, that provide differentiated learning for each level.

The curriculum that we follow builds up on the basics, strengthens the foundation and deepens the understanding of the subjects.

In foundation level our program provides children with all the basic skills and knowledge that is required to make them successful students in higher grades.

Development of motor skills, basic math concepts, introduction to math and science vocabulary, oral language development, introduction to English literature and vocabulary – these are just few things that are taught in our foundation level.

In higher grades our highly qualified and trained teachers develop and encourage further learning by introducing differentiated learning methods and using spiral way of teaching in each and every discipline.

Lots of hands on activities involving kinesthetic and audio-visual medium, technology and use of resources provided for the curriculum makes the learning an interesting process for every student.

We are proud to say that we develop our student’s language skills in English, by providing them with an excellent curriculum designed for Native English speakers, and in French and Arabic languages which are taught right from the foundation level.

Assessments are done on a continuous basis to ensure that the students comprehend the concepts well. Topic quizzes, classroom participation and behavior are stressed on as well, and play an important role in total student’s scores.

In conclusion, I would like to say that at EIS we believe in QUALITY, QUALITY AND QUALITY and if you are looking for the quality of your child’s education – EIS is the best place for your child.
